

# Sonic Orb

A portable, calibrated heat pump noise source allows you to precisely simulate and **assess the noise footprint before installation**, ensuring optimal heat pump placement and selection.

ENHANCED CUSTOMER SATISFACTION

BETTER HEAT PUMP SELECTION

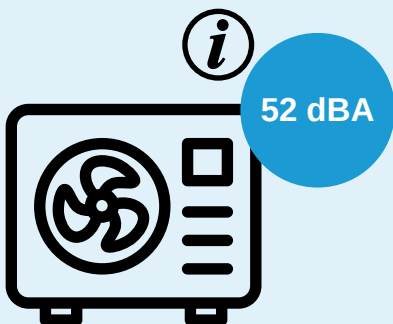

PREVENT NOISE RELATED COMPLAINTS

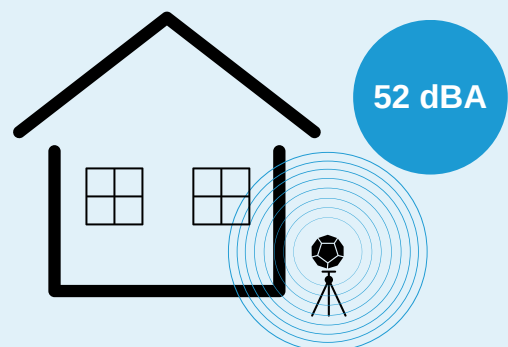

ENHANCED CONSTRUCTION PROJECT PLANNING

Check the sound power rating for the chosen heat pump model.

Generate the synthesized heat pump noise at calibrated sound power level using Humble simulator.

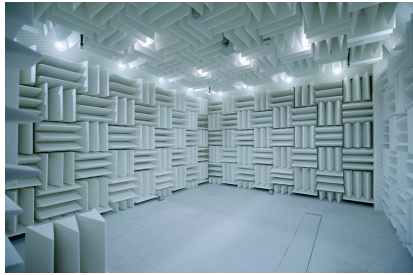

# Designed by professionals, for professionals...

Simulating heat pump noise unlocks numerous opportunities for HVAC professionals, acoustical engineers, researchers, and construction project managers.

HEAT PUMP INSTALLERS

HEAT PUMP NOISE RESEARCH

BUILDING CONSTRUCTION PROJECTS

We are committed to help accelerate the green transition of heating and refrigeration, without compromising health and comfort.
